PUSHPENDRA KUMAR

DEVOPS ENGINEER

AWS | Linux | Docker | Kubernetes | Jenkins | Terraform | Ansible | CI/CD

+91 9528658256 pushpendracse2024@gmail.com GitHub LinkedIn

Professional Summary

DevOps Engineer with **2+ years of experience** in cloud infrastructure, Linux administration, containerization, CI/CD, application deployment, and infrastructure automation. Hands-on experience with **AWS, Docker, Kubernetes, Jenkins, GitHub Actions, Terraform, Ansible, Nginx, and Linux**. Experienced in deploying full-stack applications, automating delivery pipelines, configuring servers and reverse proxies, and troubleshooting infrastructure and application issues.

Professional Experience

EasyTech Consultancy India

DevOps Engineer **May 2024 – Present**

- Managed Linux-based application environments and performed server configuration, deployment, service management, and troubleshooting.
- Provisioned and configured AWS infrastructure using **EC2, S3, VPC, IAM, Security Groups, and CloudWatch**.
- Built and maintained **Jenkins and GitHub Actions CI/CD pipelines** for automated build, testing, and application deployment.
- Containerized applications using **Docker and Docker Compose** and worked with **Kubernetes** for container orchestration and application deployment.
- Automated infrastructure provisioning with **Terraform** and server configuration/application setup using **Ansible**.
- Configured **Nginx** as a web server and reverse proxy for frontend and backend services.
- Troubleshot issues related to Linux services, containers, ports, networking, firewall rules, DNS, resource utilization, application failures, and logs.

Key Project

TaskFlow Pro – Task Management SaaS

AWS, Linux, Docker, Docker Compose, Kubernetes, Jenkins, Nginx, GitHub Actions, PostgreSQL, Redis, Celery

- Deployed a full-stack task management SaaS application with **Next.js frontend** and **Django REST Framework backend** using a Linux-based cloud environment.
- Created Docker images and managed frontend, backend, database, cache, and worker services using **Docker Compose**.
- Configured **Nginx reverse proxy** for routing HTTP/HTTPS traffic to application services.
- Implemented CI/CD workflows using **Jenkins/GitHub Actions** for source checkout, build, testing, Docker image creation, and deployment.
- Configured **PostgreSQL, Redis, and Celery** and handled environment variables, application configuration, logs, and deployment troubleshooting.

Technical Skills

Cloud:	AWS EC2, S3, VPC, IAM, Security Groups, CloudWatch, GCP
DevOps:	Docker, Docker Compose, Kubernetes, Jenkins, GitHub Actions, CI/CD
IaC & Automation:	Terraform, Ansible, Bash, Python
OS & Web:	Linux, Ubuntu, Nginx, Reverse Proxy, HTTP/HTTPS
Version Control:	Git, GitHub, Branching, Pull Requests
Networking:	TCP/IP, DNS, Ports, Firewall, Security Groups, Load Balancing
Monitoring:	AWS CloudWatch, Linux Logs, Application Logs, Container Logs
Databases:	PostgreSQL, MySQL, MongoDB, Redis

Education

B.Tech – Computer Science Engineering **2024**

Bikaner Technical University CGPA: **8.3**

12th – UP Board: 84% **10th – UP Board: 85%**

Certifications
